

# HOSTED MAIL

The RESCloud has been designed with security built in to all components, from logical to physical to people and processes.

Key Features include;

- Single Sign-on for all RESCloud services
- SSL encryption of all data
- Granular authorisation
- Message audit logs
- Automatic log off
- Enforceable password policy
- Support for encryption of mail between third parties
- Industry leading anti virus and anti spam services
- In house security experts to monitor and maintain the system

With Hosted Mail from Red Ember Solutions, only you have the key to your information. The security of your data is our top concern.

Microsoft  
Exchange Server 2007
