Cloud Strategy Services

RES considers itself a pioneer in 'Cloud' innovations. With our RESCloud SaaS platform we have real-world 'Cloud' experience. RES consultants can provide expert advice on strategies, concepts, designs, facilitations and limitations, helping organisation to successfully leverage all the 'Cloud' has to offer.

Infrastructure Services

RES has many years experience providing services to large enterprises, our consultants are specialists in high availability, systems management, and disaster recovery. RES can provide expert consulting in infrastructure design, testing and implementation across a variety of technologies.

Virtualisation

RES consultants design and deliver solutions that allow organisations to maximise hardware utilisation and optimise infrastructure. Designs focus on improving availability and agility empowering organisations to respond quickly to changing markets. RES consultants also specialise in optimisation and consolidation techniques enabling organisations to move towards a greener IT environment.

Information Security Services

Our experienced security consultants are highly skilled in the provision of information security services including security architecture, risk assessment, control definition and policy development. RES consultants also provide infrastructure security services in the design and implementation of secure networks, network zoning, eCommerce DMZ's and remote access solutions.

Messaging and Collaboration

RES has specialist consultants who focus on enabling your business to collaborate effectively and efficiently via a variety of mechanisms to provide a seamless end user experience.

Fast becoming a trusted brand in consulting services in the Perth market, Red Ember Solutions excels in customer service and quality throughout the organisation.
