

Red Ember Solutions' RESCloud platform provides extremely secure, highly available, enterprise class hosted solutions. Our easy to use Customer Self Service Portal simplifies administration of our hosted solutions, giving you the control required to perform day to day tasks such as user creation. All our hosted solutions are billed on a monthly subscription basis, allowing you to smooth out your IT spend and simply predict future costs.

Red Ember's hosting solutions allows your business to get moving without the barriers of large upfront capital expenditure. With our solutions you don't have to invest in your own hardware and software or sign-up to expensive maintenance contracts. Choosing to partner with Red Ember, your business can take larger steps forward, concentrating on what you do best, leaving your IT requirements to us, what we do best.

Today's business world is competitive and fast-paced. Rapid product and service development is the key to obtaining your competitive advantage in the marketplace. With the use of Red Ember's enterprise-grade business solutions, you can consume our hosted services without the need to go through the delays associated with designing, procuring and implementing IT infrastructure. We will help you leverage an IT solution effectively, streamlining your operations in order to reduce costs but maintain quality, allowing you to market your products and services faster than ever.
